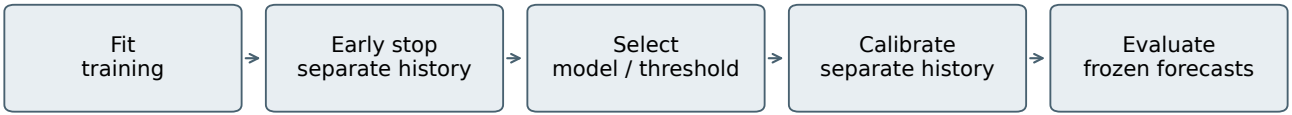
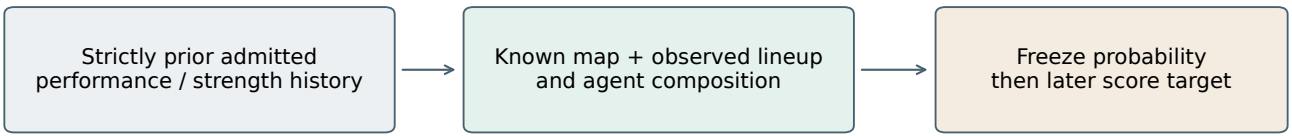
Prediction horizons and chronology

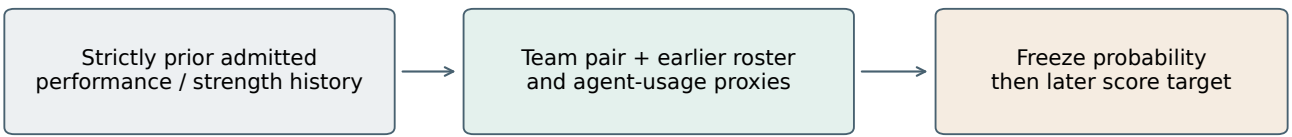


Retained later continuation reuses fitted models, thresholds and calibrators.

Map winner after picks



Series winner before play



Prediction cutoff: scheduled start − 15 minutes; actual input publication unverified.

Core historical release: schedule + 2 hours. Online release: schedule + 6 hours.
Only strictly earlier releases enter history; equal-time expectations remain frozen.
Globals do not update history. The new unreviewed cohort is score-only.
Roster and availability clocks are proxies; this diagram does not establish live availability.

Schematic, not to scale. Before-play series never uses actual future picks or performance.
